

Voice-activated  
texting is more  
distracting than  
handheld texting.<sup>1</sup>

More than 30 studies  
show hands-free  
devices are no safer  
than handheld.<sup>2</sup>

About 26% of all car  
crashes involve cell  
phone use- including  
hands-free!<sup>3</sup>

80% of U.S. drivers  
believe hands-free  
cell phones are  
safer than  
handheld...  
but they are wrong.<sup>4</sup>
